

r19.0.1 Changelog

```
+-----+  
| r19.0.1 Release - 80825 |  
+-----+
```

Release day - 11th August

Bugs

- DSOF-17843 - User can now upgrade to r19.0 without seeing an installer error
- DSOF-17767 - Camera editor preview will no longer flicker in a virtual camera or MR set when overscan is set to 1,1.
- DSOF-17703 - Fixed an issue where project sync to Actor machines with large amounts of content would cause project corruption, resulting in a crash to desktop
- DSOF-17516 XR: - An Access Violation will no longer occur when attempting to open Check Coordinate System widget before any observations are taken
- DSOF-16601 - Exporting current frame of an MR set in the feed view will no longer generate a blank PNG file
