## r24.1 Changelog

+-----+  
| r24.1 Release - 156386  
+-----+

Release day 28th March 2023

**For any vx 4+ users please refer to this advisory before using this Designer software version' and link to the advisory on the website.**

## New Features

- DSOF-23365 - The improved GPU memory management system shipped in r24.0 behind the option switch 'useGpuPool' is now enabled by default. It provides reliable stability for demanding video playback loads and other high-memory-usage scenarios

## Fixes

- DSOF-23038 AV in "Upload assets" test case in test\_cloudserver
