

r26.1 Changelog

+-----+
| r26.1 Release - 171936
+-----+

Release day November 1st 2023

Fixes

- DSOF-22666 - Fixed an issue where d3 would hang due to a network security sweep
- DSOF-24346 - Added logging to Live Update option switch
- DSOF-24360 - Fixed an issue where RenderStream Uncompressed only received texture parameters on the first adapter
- DSOF-24786 - Fixed an issue where installing HDMI VFC REV E cards in a system after having QSDIVFC cards installed caused d3 to stall when loading
- DSOF-25156 - Added DCS sensor width manual column
- DSOF-25283 - Fixed an issue where project templates caused an error during install
- DSOF-25440 - MatroxApi now warns the user when there is driver and SDK version are mismatched
- DSOF-25468 - Fixed an issue where Arri LDS device was not parsing raw encoder values for zoom or focus distance
- DSOF-25527 - lenscalibrator.exe is now code-signed
