

r30.0.3 Changelog

+-----+
| r30.0.3 Release - 203189 |
+-----+

Release day: November 27th 2024

Fixes

- **DSOF-25924** - V1 api calls to netconf and content\remotesources endpoints now work correctly again. (These APIs are deprecated so we may not guarantee functionality going forward)
- **DSOF-27929** - Clear Media Ingestion History will no longer fail with an access violation in projects that use projectors.
- **DSOF-28511** - Analysing GPU pool usage with the profileGPUPoolFromLaunch option switch will now be easier to use to diagnose GPU memory issues.
- **DSOF-28553** - Exception logs are now more useful to our developers by correctly identifying the memory address of the module.
- **DSOF-28632** - The expressions: currentFeatureName, currentFeatureTime, nextFeatureName and nextFeatureTime now correctly report about upcoming Tags as well as Notes.
- **DSOF-28732** - OSC output expressions now display helpful tooltips when there is an expression error.
- **DSOF-28805** - Actors will now correctly receive Renderstream streams again.
