

r30.7.3 Changelog

```
+-----+  
| Release Full (Pro) - 215806 |  
| Release Starter - 215804 |  
+-----+
```

Release day: April 23rd 2025

Fixes

- DSOF-30053 - RenderStream texture parameters will no longer intermittently fail with an access violation in rare circumstances.
- DSOF-29524 Designer will no longer drop frames when switching tracks or distributing media in very complicated projects.
- DSOF-30071 - Users can now use dot notation to subscribe to sub-resources with the [live update API](<https://developer.disguise.one/api/session/liveupdate/>).
- DSOF-30100 - Starter licenses will no longer occasionally fail to be installed on machines that have never had Designer installed before.
- DSOF-30082 & DSOF-29922 - Installer logs are now more detailed to help with finding and fixing errors.
- DSOF-29873 - When installing a new version of Starter, old Starter Codemeter containers are now correctly removed.
- DSOF-29853 - The About Designer Starter dialogue box now correctly displays in all DPI scales.
- DSOF-30089 - Designer uninstaller now correctly removes temp files that you don't need anymore.
- DSOF-30127 & DSOF-30128 - Stopping a RenderStream workload in a high latency environment will no longer display spurious notifications and console logging.
